**HERE'S HOW TO INCREASE YOUR BUSINESS PROFITS  
BY AUTOMATING THE CUTTING AND DEBURRING  
PROCESS**

Introduce the AFCSERIES system immediately and Make  
Your Production Process Sure:

1. Machine Designed in Every Detail
2. Specific work units
3. Process independent from the operator

**If you are looking for an automated system that  
reduces your production costs.....**

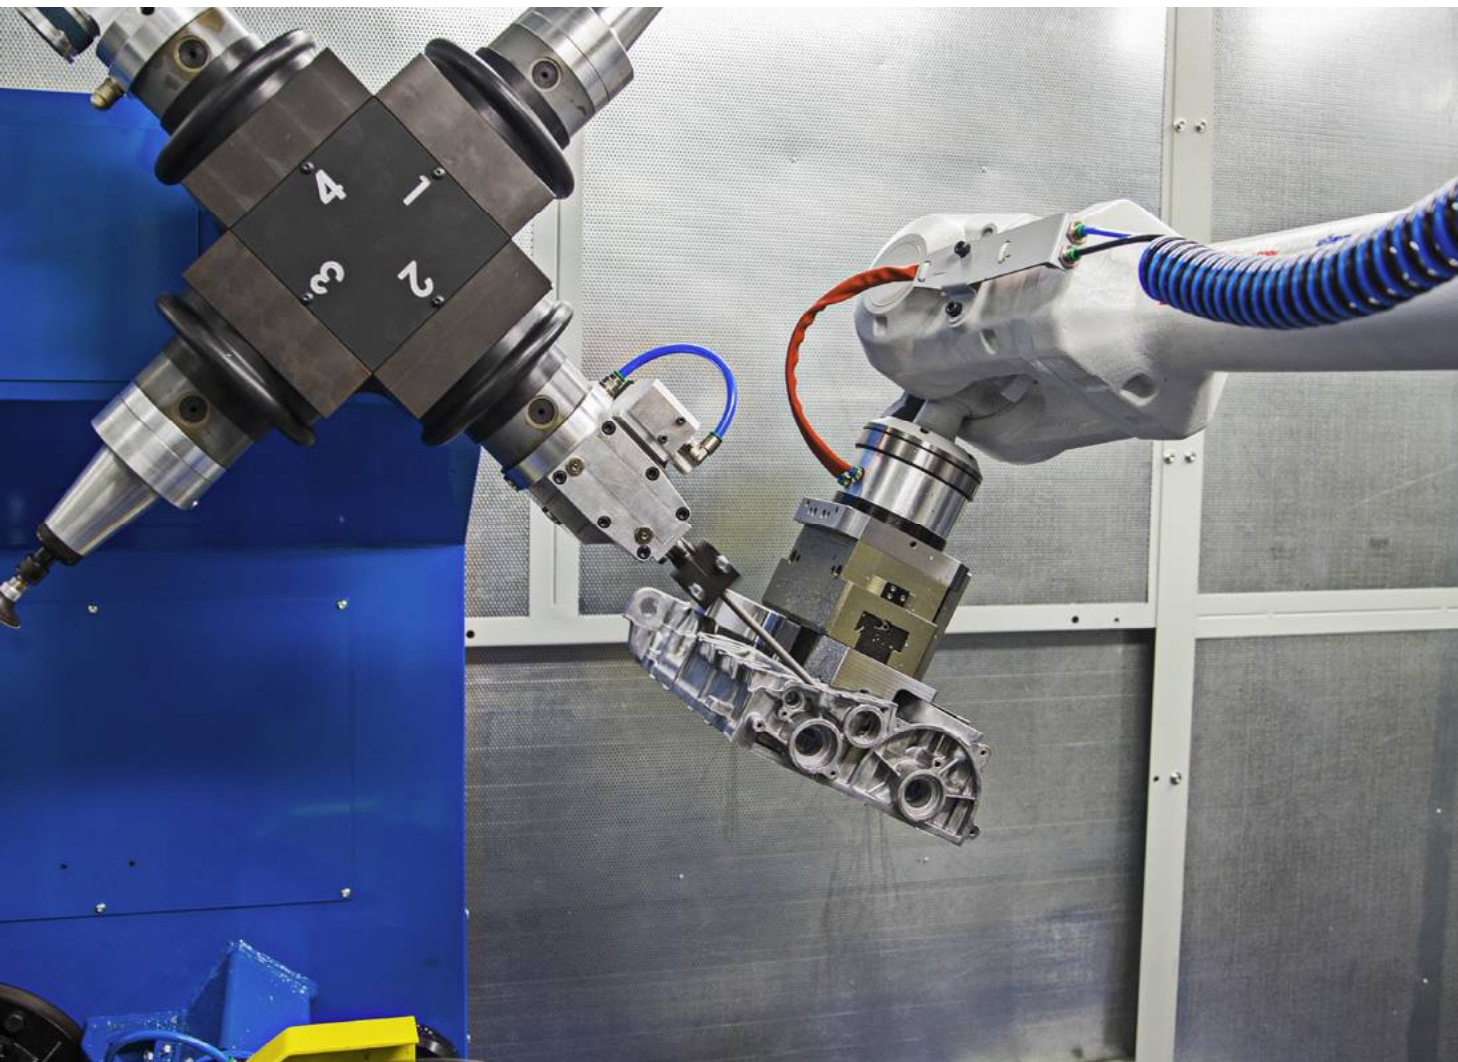

**... Well, keep the common traditional manufacturers  
on the market at a distance forever:**

- + No to makeshift machines
- + No to commercial work units
- + No to operator as reference points for your process

**DISCOVER THE AFCSERIES SYSTEM! →**

**THE AFC SERIES IS THE LATEST CONCEPT BY TREBI** for aluminium casting production, which allows to automatically cut and deburr pieces.

This machine series is divided in two lines:

- + **In the casting cell**
- + **Out of Line**

**“In the casting cell”** is a fast solution mainly for cutting.

**“Out of Line”** is a highly configurable solution according to any need and can perform any finishing operation.

**HERE ARE THE AFC SERIES OPERATIONS →**
